Ahmed Slim

Full stack Web/Mobile Developer | Graphic Designer | Marketing Manager
Sousse, Tunisia

Summary

I bridge the gap between engineering and creative design. Experienced in building Web and mobile apps and scaling e-commerce and enterprise brands. Dedicated to crafting seamless digital products with clean code and compelling visuals.

Experience

TERA ENERGY
Marketing Manager
September 2025 - Present (7 months)
Tunis, Tunisia

Spearheaded the digital launch of TERA ENERGY, a new beverage and snack brand entering the Tunisian market. I led the end-to-end digital strategy, combining web development with content creation to build brand awareness from the ground up.

Key Contributions:

Website Development: Designed and developed a responsive showcase website (Site Vitrine) to display the full product portfolio (Energy Drinks, Juices, Snacks), ensuring a modern UI/UX aligned with the brand identity.

Social Media Management: Managed all social media channels (Facebook, Instagram, Youtube...), fostering community growth and engagement prior to the official market launch.

Content Creation: Produced high-quality visual assets, including promotional posters, product photography, and engaging video edits to drive hype and anticipation.

Digital Strategy: Executed "Coming Soon" campaigns and teaser strategies to maximize audience reach and interaction.
